## **Background**

Taaleem Foundation (TF) is a professionally managed, non-profit organization set up in 1989 by Dr. Zafar Qadir who wanted to bring about positive social change through education. 28 years later, TF is now one of Pakistan's leading organizations in the field of education for the less privileged; running a chain of high quality secondary schools and vocational training institutes across Pakistan.

The Pakistani education system is currently suffering from inequality in educational outcomes on a massive scale. There are significant variations in the quality of education provided from one child to the next, both between schools and within schools. This is pervasive issue of a lack of equity literacy.

To combat this challenge, TFGS is working from more than 2 decades in eight different stations in Baluchistan to combine cutting-edge technology with modern pedagogy, thereby providing an effective e-learning solution and scalable method of quality education. TFGS ensures that every student is given equal opportunity for success and the technology-based delivery system allows it to cater his or her needs.

Taaleem Foundation is registered as a Society under the Societies Act 1860 in Pakistan. Taaleem Foundation is an edu-tech network, engaged in creating e-learning solutions delivered through e-learning labs, with an aim to provide the quality education though equity literacy. Apart from the regular course of studies, these interactive classes explicitly link students' prior understanding on a topic and previous classroom activities.
